

The future depends on effective execution of strategic projects.

THE STRATEGIC PROJECT NAVIGATOR™

plots a clear course through the uncertainty and complexity created by market transforming projects.

1 The Project Definition Developer™

An intensive project review expands beyond the traditional cost, time and quality areas to determine the major disconnects between the business objectives and project goals. The most critical execution challenges are identified with a short-term corrective action plan.

2 The Project Triage™

A twenty-day focused engagement to resolve the most significant issues impacting project execution. Additional outcomes include a full project execution assessment with a master and short-term execution plan.

3 The Project Battle™

With renewed clarity the focus is on commitment, accountability and delivery of short-term objectives. Project status is communicated and planning is controlled with a comprehensive one-page executive report.

4 The Project Guardian™

5 The Finish Line Process™

Transfers the winning momentum, tools, knowledge, and confidence generated by the project's success to your team so they can manage future opportunities in your business with an improved skill set.

Strategic projects are highly dynamic and require extraordinary vigilance, resource coordination, issue resolution and decision making to stay on course. Waypoint provides leadership, mentoring and training for these critical areas.
